“Sand Trap”
Sale Area: 90 Acres
Tract # 8001-03-24

Location: Township of Clover Bayfield County, Wisconsin

Comp-Stand	Town	Range	Section	Acres
195-7	49N	7W	14,15	12
195-15	49N	7W	14,15,22	11
195-16	49N	7W	14,15	23
195-33	49N	7W	15	44

SPECIES	VOLUME	MBF
Aspen	1100 CDS	
Oak Pulp	540 CDS	
Jack Pine	170 CDS	
Red Pine	110 CDS	
Mixed Hardwood	165 CDS	
Oak Logs		15

Minimum Acceptable Bid: \$29,690.00

- Red Pine conversion rate will be 2.25 tons per cord.
- Jack Pine conversion rate will be 2.125 tons per cord.
- Aspen conversion rate will be 2.25 tons per cord.
- Mixed hardwood conversion rate will be 2.4 tons per cord.
- Oak conversion rate will be 2.75 tons per cord.

* Mixed hardwood total contains approximately 160 cords of red maple and 5 cords of white birch.

* Red Pine total contains approximately 35 mbf.

Harvest Requirements

* Cutting prescriptions are listed on the sale map.

Design Features and Mitigation Measures

The following requirements apply to all stands:

- Do not harvest trees or operate equipment across **orange** or **red** paint line.
- The harvesting of any portion of a tree that lies outside the physical ownership of the Forest Service will not be allowed. Trees lying across the property line must be bucked at the ownership line and all portions of the tree that reside on the private side of the line must be left in place. Conversely, the remaining portion of the tree that lies within the physical ownership of the Forest Service may be harvested and utilized.
- Discourage the spread of non-native invasive species, especially spotted knapweed, and the common buckthorn through proper cleaning of logging equipment before entering and leaving the sale area.
- Reserve all snags unless they pose a safety concern. A maximum of 10 snags per acre is desired.
- All pine products cut between May 1 and September 1 must be removed from the sale area within three weeks from time of cutting. Pine products cut during the remainder of the year must be removed prior to May 1 of each year.
- No harvest (or other treatments that may damage oak trees) will be allowed April 1-July 15 due to Oak wilt concerns.
- Whole tree/biomass harvesting is prohibited.

The following are stand specific slash requirements:

- All slash 100 feet from the edge of all roads and trails should not exceed 2 feet in height.
- All slash must be removed within 10 feet from any private boundary or recreational trail.
- Visible portions of timber harvesting, or other vegetation removal areas should receive the primary emphasis for slash treatment.

The following are specific road and trail requirements:

- Chequamegon-Nicolet Forest Plan requires that all native surfaced approaches to paved or graveled roads have 100 ft. of gravel, 6 in. deep and 12 ft. wide put down when used during non-frozen conditions.
- All landings and skid trails will be blocked to vehicular access and possibly re-seeded at the conclusion of use if needed.
- Purchaser required to post signs on USFS roads alerting recreationalists of thinning activities.
- All road maintenance and rehabilitation post-harvest is the purchaser's responsibility. A sample contract including road maintenance specifications can be obtained by request.
- The location and clearing widths of all Temporary Roads shall be agreed to in writing before construction is started. "Temporary Roads" are roads other than Specified Roads that are constructed by Purchaser for the purpose of harvesting included timber.
- Temporary Roads shall have the road base constructed to a width of 12 feet or narrower, and with vegetative clearing of trees and brush not to exceed a width of 25 feet. Exceptions to the 12-foot maximum width of the road base may be granted by the sale administrator. Exceptions would typically be granted for sections of temporary roads where tight turns, curves, and terrain create a need so that trucks and equipment can be operated safely.
- All Temporary Roads and other Roads noted in prescription for use in sale will be closed from working when sale is completed. Due to excessive ATV use and "sand country" the Washburn District utilizes logging slash/stumps/debris for 100 feet beyond the berm. GNA sales will need to be consistent with current Washburn District Forest Service practice.
- Road maintenance and restrictions details are listed in the timber sale contract. Please contact the forester listed on the sale map for more information.
- No decking on town roads without township permission. Certain townships require written permission. This document will be required in selected townships.
- For protection of motorized trails design feature applies to **Atv/Snowmobile** trails and not entire stand:
 - No hauling activities allowed during spring closure (March 15 – April 30th), on weekends or holidays (weekends are Friday 6 pm through Sunday at midnight; holidays include Memorial Day, 4th of July, Labor Day, Thanksgiving, Christmas Eve, Christmas, New Year's Eve & New Year's).
 - If the trail is closed during logging operations, decks and landings can be placed on the trail bed. Where groomed trails are utilized for haul routes for winter operations, a mat of hard packed snow will be maintained

on the trail at all times, except on short segments of steep (>15%) slopes. When possible, reroute the snowmobiles and/or ATVs during active sale operations to avoid user conflicts.

- For trails that remain open while being used for haul routes, signs notifying trail users to slow down and be aware of logging ahead will be posted on each end of the trail where timber harvest and hauling activities are occurring. Caution signs will also need to be placed at major intersections of roads that provide access to recreation sites or other trails. Timber activities occurring adjacent to motorized trails that are open for use during the logging operations will locate decks perpendicular to the trail in a way to prevent loading on the trail if possible.
- If trail should need to be rerouted to prevent conflict. Work with sale administrator to make this happen.
- Work with sale administrator and landowner when using skid trails or temp roads along private property.

Additional Requirements

- Sale will be billed using mill ticket system.
- No bid bond required, a performance bond of 15% of the total sale bid value will be required.
- 3-year contract period. **Contract ending date of June 30, 2027.**
- **NO SALE MAY BEGIN WITHOUT PRIOR NOTIFICATION AND AN ON-SITE MEETING WITH A WISCONSIN DNR SALE ADMINISTRATOR.**

I understand that any or all bids may be rejected and that consideration and awarding of a contract will be based upon my past performance and ability to complete contracts. **I also understand that if I am the winning bidder, I have 6 weeks from the date of the bid opening to submit an acceptable performance bond. I also understand that if I am awarded the contract and fail to execute it or work under it, I will be required to forfeit to the Department an amount equal to 10% of my total bid amount.** Failure to forfeit the 10% penalty will result in being considered ineligible to bid on any state timber sales for a two-year duration. In the event the highest bidder can not or will not sign the contract, the award may be made to the next highest qualified bid.

By checking this box, I certify that I hold a Wisconsin Master Logger Certification.

Notice: I understand:

Utilization specifications and estimated volumes are listed in the prospectus which is available upon request from the Department.

A copy of the standard timber sales contract which must be entered into is available upon request from the Department.
