Scaled Sale

Advertised Value for Entire Sale = \$33,336.00

**Special Operating Requirements and Slash Disposal:**

1. This sale had significant storm damage in summer 2023. **Contract length is limited to one year** to prevent further windthrow losses and to release existing oak regeneration while small enough to recover from logging damage. **No cutting between April 1 and July 15 to prevent oak wilt infection.**
2. The sale boundaries are red paint lines, town roads and woods roads.
3. The sale is completely dry, but includes some hills. The DNR forester will work with the harvester operator to determine if some areas are too steep to cut.
4. No biomass harvesting is allowed on this sale due to poor soil nutrient levels.
5. This sale will not require spraying for HRD, as it is being converted to oak.
6. Damage to oak and red pine seedlings must be kept to a minimum. White pine is not a preferred component of the stand, so protection of these seedlings is not necessary.
7. All pine products cut between March 1st and August 30 must be removed from the sale area within three weeks from time of cutting. Pine products cut during the remainder of the year must be removed before March 15<sup>th</sup>.
8. Slash must be evenly lopped/scattered within the sale boundary and shall be deposited a minimum of 10 feet from the mowed right-of-way of any highway, town road, or recreational trail. Slash within 50 feet of all town roads and recreational trails must lie within 2 feet of the ground. Do not bury seedlings or saplings with slash.

**General Requirements:**

1. All designated tree species must be cut and forwarded concurrently with the sale.
2. All stumps shall be no higher than the stump diameter, or 10 inches, whichever is less.
3. Do not cut or knock down any dead or hollow trees. These are important wildlife habitat. Any that must be cut shall be left in big pieces on the forest floor.
4. Utilization: cut and use all designated trees with one or more 100” sticks to a 4” top diameter.
5. Notify the DNR forester before you start the job, and each time you pull out or return to the job.
6. Any new roads and all landings must be approved by a DNR forester before operations begin.
7. Any berms removed during harvesting operations must be put back to the satisfaction of the DNR Forester.
8. Any trees cut or pushed over for roads or landings must be utilized or cleaned up to the DNR Forester’s satisfaction.
9. Contact the Town of Millston at 715-284-0913 prior to beginning logging operations. A permit is required for hauling heavy loads and equipment on all town roads year-round.
10. **Wisconsin’s Best Management Practices for Invasive Species applies – contractor must clean equipment before entering and leaving the sale area! This involves brushing away all dirt and cleaning air intakes of debris.**
