

## ENABLING AUTOMATIC DOWNLOADS FROM THE DNR WEBSITE

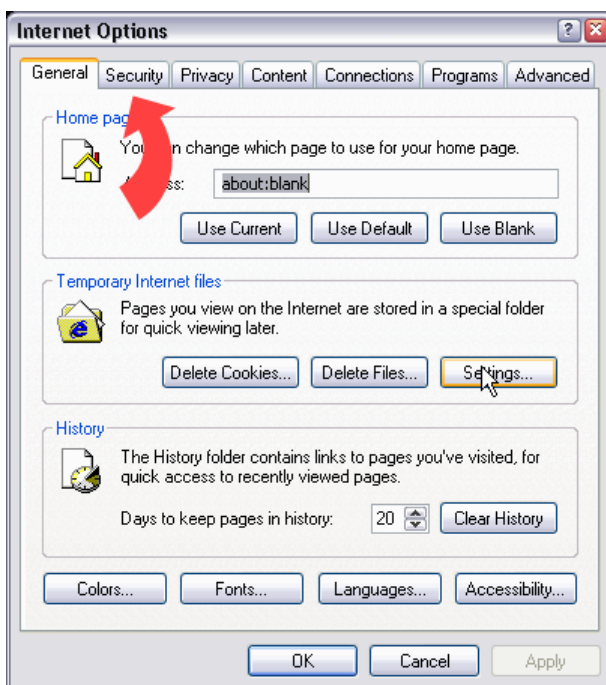

People using Microsoft's Internet Explorer many have difficulty downloading files from the air permit website. This is usually due to a default security setting in the web browser that disables the automatic file downloading feature. The following step describe how you can add the Wisconsin DNR website to the trusted sites list in your web browser which will enable automatic download prompts. *Please contact your company's system administrator for assistance if you have questions on how to add a trusted site or if your security settings are disabled or unavailable.*

### Step 1

In your browser, open the "Tools" menu and click on the last entry: *Internet Options*.

### Step 2

In the *Internet Options* window, click on the *Security* tab as shown on the image on the right.

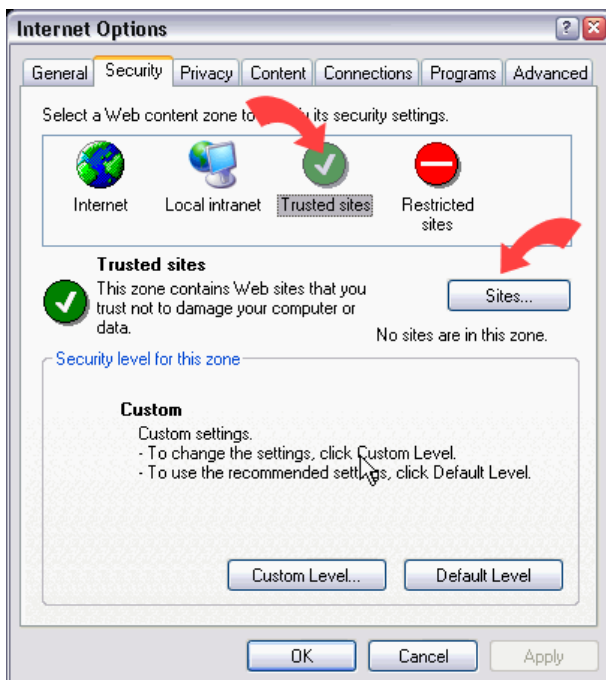

### Step 3

In the *Security* tab, click on the *Trusted Sites* icon.

### Step 4

Click on the *Trusted Sites* button, to display the *list* of sites in the *Trusted Zone*.

### Step 5

Fill in the text box with *https://dnr.wi.gov* as shown in the image on the right and click the *Add* button.

### Step 6

Click *OK* until all the windows are closed.
