

Recommendations
by the
Groundwater Advisory Committee:
Report to the Wisconsin Legislature
Pursuant to 2003 Act 310
December 31, 2007

Table of Contents
Executive Summary

Chapter 1: Introduction
 Background
 Legislative Charge

Chapter 2: Groundwater Protection Areas (GPA)

- 2.1 Existing Framework
 - 2.1.1 Background and discussion of GPAs
 - 2.1.2 High capacity well application review process
 - 2.1.3 DNR experiences with wells in GPAs since enactment of Act 310
 - 2.1.4 Assessment of effectiveness
- 2.2 Potential Modifications to GPA Framework
 - 2.2.1 Expanded scope of “protected waters”
 - 2.2.1.2 Use existing designations from other regulatory programs
(the following categories are included as examples for discussion purposes)
 - Areas of Special Natural Resources Interest (ANSRI) - NR 1.05
 - Trout streams, ORW, ERW
 - State natural areas
 - Threatened & Endangered species (NHI Waters)
 - Designated Wild or Scenic Rivers
 - Identified wild rice waters
 - Ecologically significant coastal wetlands
 - Waters in areas covered by a Special Area Management Plan or Special Wetland Inventory Study (Superior, Chiwaukee Prairie, Green Bay)
 - Waters with Public Rights Features (PRF) - NR 1.06
 - Fish and wildlife habitat
 - Reaches ensuring water quality protection
 - “Natural” reaches or reaches that screen artificial features
 - Navigation thoroughfares
 - Sensitive areas designated under NR 107.05(3)(i)
 - Areas specified in Wis. Land Legacy Report
 - Priority Navigable Waterways – NR 1.07

- ANSRI waters
- PRF waters
- Trout streams , ORW, ERW
- Waters w/ naturally-reproducing sturgeon waters
- Self-sustaining walleye waters in the ceded territory
- Category 0, 1, 2 musky waters (naturally reproducing)
- Lakes less than 50 acres
- Perennial tributaries to trout streams
- Designated use categories for wastewater permitting
 - Cold water communities
 - Warm water sport fish communities

2.2.1.3 Other non-specific designations

- Wetlands
- Warm water fisheries
- Lakes
 - All lakes
 - Size criteria
 - Seepage lakes
 - “Spring-fed” lakes
- Streams
 -
 - Direct tributaries to Great Lakes
 - Streams associated with state parks, forests, recreation areas, and fish & wildlife refuges and management areas

2.2.2 Separation Distance Issues - GPAs

2.2.2.1 Significance of specified distance – Implementation approaches

- buffer requiring additional review
- strict setback requiring a variance/exemption
- combination –setback (e.g., 300’) w/ larger buffer (e.g., 1,200)

2.2.2.2 Recommended distance(s)

2.3 Adequacy of approval/review process

2.3.1 Application requirements

2.3.2 Review process

2.2.3 Approvals

2.4 Adaptive management issues – GPAs

2.5 Recommendations for legislation

2.6 Recommendations for administrative rules

Chapter 3: Springs

- 3.1 Existing definition
 - 3.1.1 Assessment of effectiveness – DNR experiences, documented problems
 - 3.1.2 Research – Inventories of springs
 - 3.1.2 Sensitivity of springs to impacts from pumping
- 3.2 Shortcomings/Alternative Approaches
 - 3.2.1 Specified distance or review based on potential for impact
 - 3.2.2 Adequacy of definition
 - 3.2.1.1 Flow Rate
 - 3.2.1.2 Flow frequency
 - 3.2.1.3 Surface discharge vs. other approach (pond, diffuse seepage, etc..)
 - 3.2.3 Alternative regulatory approaches
 - 3.2.3.1 Existing approach but modified criteria
 - 3.2.3.2 Consider nature of receiving water (trout stream, ORW, ERW, wetland, etc)
 - 3.2.3.3 Consider importance of spring flow to the ecology of the receiving water
 - 3.2.3.4 Consider Threatened & Endangered species
 - 3.2.3.5 Stratified approach based on size and vulnerability of spring (Based on premise that some smaller springs may be more vulnerable)
- 3.3 Regulatory Issues for addressing wells with potential to affect springs
 - 3.3.1 Adequacy of current approval/review process and requirements
 - 3.3.2 Adaptive Management Approaches
- 3.4 Recommendations for legislation
- 3.5 Recommendations for administrative rules

Chapter 4: Projects with High Water Loss

- 4.1 Background and discussion
- 4.2 Recommendations for legislation
- 4.3 Recommendations for administrative rules

Chapter 5: Determination of Significant Adverse Environmental Impact

- 5.1 Chapter NR 820 approach
- 5.2 Review of similar concepts in other states
- 5.3 Alternative approaches
- 5.3 Recommendations for legislation
- 5.4 Recommendations for administrative rules

Chapter 6: Funding

- 6.1 Existing funding sources
- 6.2 Existing and anticipated expenditures
 - Administration
 - Local Aid
 - Research
 - Mitigation
- 6.3 Adequacy of funding mechanisms
- 6.4 Recommendations for legislation
- 6.4 Recommendations for administrative rules

Chapter 7: Other Issues

- 7.1. Adequacy of statutory and rule definitions
 - High capacity well
 - High capacity property
 - One property
 - Owner
- 7.2 Mitigation in Groundwater Protection Areas and other sensitive areas
- 7.3 Appropriateness of general permits for high capacity wells
- 7.4 Legislative recommendations
- 7.5 Recommendations for administrative rules

Chapter 8: Summary of Recommendations

- 8.1 Legislative recommendations
- 8.2 Recommendations for administrative rules
