

**eCMAR SECTION INSTRUCTIONS:  
Effluent Quality and Plant Performance ((C)BOD)**

**1: Monthly average effluent values, exceedances, and points for (C)BOD:**

*Check the effluent monthly average BOD or CBOD concentrations to ensure they are correct. If the numbers disagree with your reported values, recompute the monthly averages from the individual values. If the numbers still do not agree, contact your DNR basin engineer or specialist by clicking the "CONTACT US" button or by phone.*

**2: If any violations occurred, what action was taken to regain compliance?**

*If any permit limit exceedances are shown in part 1, type an explanation in the box of action(s) taken to regain compliance.*

**3: Was the effluent flow meter calibrated in the last year?**

*Click the Yes button and enter the date (MM/DD/YYYY) of the last calibration if calibrated in the last year. If the influent flow meter was not calibrated in the last year, click the No button and type an explanation in the Explain box.*

**4: What problems, if any, were experienced over the last year that threatened treatment?**

*In the box provided, type in any problems experienced that threatened treatment.*

**5: Other Monitoring and Limits**

**5.1 At any time in the past year was there an exceedance of a permit limit for any other pollutants such as metals, pH, residual chlorine, or fecal coliform?**

*Select the appropriate Yes or No button. If you selected Yes, you are required to type a description in the box.*

**5.2 At any time in the past year was there an effluent acute or chronic whole effluent toxicity (WET) test?**

*Select the appropriate Yes or No button. If you selected Yes, you are required to type a description in the box.*

**5.3 If the biomonitoring (WET) test did not pass, were steps taken to identify and/or reduce source(s) of toxicity?**

*Select the appropriate Yes, No, or NA (if no tests were performed) button. If you selected Yes, you are required to type a description in the box*
