

**eCMAR SECTION INSTRUCTIONS:
Effluent Quality and Plant Performance (Total Suspended Solids)**

1: Monthly average effluent values, exceedances, and points for TSS:

Check the effluent monthly average TSS concentrations to ensure they are correct. If the numbers disagree with your reported values, recompute the monthly averages from the individual values. If the numbers still do not agree, contact your DNR representative by clicking the "CONTACT US" button or by telephone.

2: If any violations occurred, what action was taken to regain compliance?

If any permit limit exceedances are shown in part 1, type an explanation in the box of action(s) taken to regain compliance.
