### Warm Water Advisory Committee:

The mission of the Warm Water Advisory Committee is to review, discuss, and make recommendations on questions, rules, and policies concerning warm water fisheries in the State of Wisconsin. The scope of this review includes all bodies of water (lakes, rivers, and streams) located within the state as well as boundary waters surrounding Wisconsin. Furthermore, it includes all fish species traditionally known as "warm water" species regardless of what type of water body they may be located in. Our recommendations are made in an advisory capacity to the public, the Department of Natural Resources, the Natural Resources Board, and the Conservation Congress. The committee supports the long term goal of protecting and enhancing our warm water fishery resource for future generations of Wisconsin citizens.
