The DNR Managed Lands represent the boundaries of lands managed by the Wisconsin Department of Natural Resources. The Wisconsin DNR manages these lands through ownership, easement or lease rights. The data set is a digital representation of the Census and Statistics System maintained by the DNR Bureau of Facilities and Lands. It does not include minor parcel boundaries. The data should not be interpreted as a legal representation of right-of-way boundaries.

This data set does not differentiate between lands that are open or closed to the public for hunting, waterfowl, general public access. Some lands represented in this data set may not be open to the general public, or may have special restrictions on their use. This data set is not intended for use as a land management tool. It is a listing of all DNR real estate transactions that have occurred on these lands over time.

For information about the actual management, including public use and public access of the lands, contact the nearest DNR Regional Office. Contact information for DNR Regional Offices and Service Centers is provided on the following internet site:
<http://www.dnr.state.wi.us/org/cas/servicecenters/locations.htm>

Updates to this data set are ongoing, and will be incorporated into future versions when available.
